

The Sheraton Fort Lauderdale Airport is proud to be a certified **Florida Green Lodge**. As part of this crucial effort we have a “**Green Team**” to focus on opportunities to Recycle, Reduce and Reuse.

To do this we have the following initiatives in place:

1. Streamlined recycling program for newspapers & inserts, magazines, catalogs, office paper, mail & junk mail, cardboard boxes, cereal boxes, tissue boxes (all boxes are to be flattened), bottles, (without caps or lids), plastics #'s 1, 2 & 3 (typically marked on bottom of container), containers made of steel, tin and aluminum, (to be rinsed first), loose glass bottles and jars, (no caps). **Main recycling Bin is located in back dock area. Individual “streamline recycling cans” located in designated areas of each department for department recycling. Additionally “streamline recycling cans” located on guestroom floors in vending machine areas. Notice in all guestrooms informing guests of recycling areas.**
2. Linen and Towel Reuse program in place for guests.
3. All used Florescent light tubes and rechargeable batteries are brought to Home Depot and dropped off at the service desk for recycling.
4. The following “green” environmentally friendly cleaning products are now being used and all are furnished by Ecolabs:
 - Oasis 305G Bathroom Cleaner # 17705
 - Oasis 139G All Purpose # 17704
 - Oasis 258G Glass Cleaner #17700
 - Oasis 280G Deodorizer #15804
5. All used printer and copier inkjet and laser toner cartridges are to be dropped off to the nearest “Green Team” member for collection to ship to Recycle4Charity. More information on organization located at www.recycle4charity.com
6. Hotel uses High Efficiency Lighting inside and outside the hotel.
7. New Air Handlers are being installed in general and public areas of the hotel.
8. All guestrooms have sensors that control turning on the air conditioning so it does not run in an unoccupied room.

We thank you for considering a stay with us and doing your part to save our environment. At Sheraton, you belong!
