## STARWOOD HOTELS GROUP PROGRAMS

Starwood Hotels has created programs to assist meeting planners in managing their room blocks and attaining their minimum number of room nights in order to avoid any attrition penalties:

This internet tool allows us to create a website for your meeting to allow participants to book directly into your room block. We will personalize the website with your logo and brief description of the meeting. Features include real-time reporting so that at any given time, you, as the meeting planner, can print a rooming list or a pick-up report.

Visit for demo: [http://www.starwood.com/meetings/about/star\\_groups\\_demo.html](http://www.starwood.com/meetings/about/star_groups_demo.html)

Reservation Connection provides seamless reservation integration between third party housing bureaus Passkey and Travel Planners and Starwood. Any meeting planner also now has the ability to send an Excel-formatted rooming list directly to a Starwood property through a secure website. This rooming list is processed into StarLink and then transfers through IPS directly into the Property Management System (PMS). With Reservation Connection groups can:

- Eliminate errors associated with manual data-entry
- Upload group reservations with a click of a mouse
- Improve attendee satisfaction with more accurate reservations
- Eliminate the need for paper rooming lists
- Provide a meeting planner with a property rooming list and confirmation in a timely fashion

Starwood's Reservation Cross Check automatically produces a list of everyone who stayed inside the block, outside the block, the number of reservations, the number of room nights, and total guest room revenue. The meeting manager's only responsibility is to provide the hotel with their event's registration list (via Excel).
